APPLICATION RATES

Foliar- Apply 1-4 quarts per acre with repeat applications at 12-21 days through full bloom for a maximum of 3 applications. Spray carrier volumes typically are 10-20 gallons per acre.

Soil- 2-4 quarts in-furrow at planting and/or at side-dress application.

Air- Check with sales tech for air application directions.

AgroDyne VELO can be used on all soil types and crops both organic and conventional as a standalone product or in conjunction with most fertilizers, herbicides and fungicides.

Consult your local crop advisor when using and always jar test when mixing products.

STORAGE & HANDLING

Store in a cool, dry place. Shake or mix well before use. Do not allow to freeze if possible for long term storage. Disposal in accordance with local regulations.

WARNING: Keep out of reach of children and livestock.

Avoid contact with skin and eyes.
Do not swallow.

If contact is made with skin or eyes, flush with water.
