EQUALIZER FOLIAR

Proprietary Agrodyne
Foliar Crop-Response System

Equalizer Foliar is a proprietary Agrodyne multi-part foliar crop-response system designed to support leaf penetration, delivery of minerals, and natural extract support for stronger visible crop performance.

It is built to fit practical foliar programs and can be used effectively on its own or as part of a broader soil-plus-foliar system.

WHY EQUALIZER FOLIAR

- Proprietary multi-part foliar system
- Supports visible crop response
- Built for practical foliar programs
- Strong fit for air and ground application systems

USE & APPLICATION

- 1 pint to 1 gallon per application
- Ground rig, airplane, helicopter, drone, or other air applications
- Use enough carrier for good foliar coverage

BUILT TO WORK WITH YOUR PROGRAM

- Works as a stand-alone foliar tool
- Becomes even stronger as part of a fuller soil + foliar system
- Practical fit for modern low-volume and aerial application systems
