# EQUALIZER SOIL™

◀ **PROPRIETARY AGRODYNE SOIL  
CROP-RESPONSE SYSTEM** ▶

Built to support stronger below-ground performance through a proprietary **4-part system**.

## THE 4-PART SYSTEM

### TRACE MINERAL SUPPORT

Delivers essential  
nutrition for plant  
function.

### HUMIC CARBON SUPPORT

Supports soil health  
and nutrient  
availability.

### FULVIC MINERAL DELIVERY

Enhances uptake  
and mineral  
transport.

### AGRODYNE SIGNALING TECHNOLOGY

Helps synchronize  
plant and soil  
performance.

RESOURCES

# BLEND-FRIENDLY. PRACTICAL. BUILT FOR REAL PROGRAMS.

Equalizer Soil is a proprietary Agrodyne soil crop-response system designed to support stronger below-ground performance through a balanced approach: trace mineral support, humic carbon support, fulvic mineral delivery, and Agrodyne Signaling Technology.

Built for real-world fertility programs, it supports nitrogen efficiency, mineral replacement, and practical program flexibility.

## BLEND-FRIENDLY

- ✓ Compatible with UN32, most fertilizers, and most calcium products.
- ✓ Built to blend friendly for growers and distributors.
- ✓ Jar test when blending with unfamiliar or concentrated materials.

## CALCIUM BLENDING CAPACITY

- ✓ Compatible with most calcium products
- ✓ Supports practical blending flexibility
- ✓ Jar test with unfamiliar or concentrated materials
- ✓ Fits real-world fertility programs

*Stronger below-ground performance with  
the flexibility your programs need.*

## EVERY PROGRAM. EVERY FIELD. REAL-WORLD VALUE.

Equalizer Soil is designed to fit the way you farm.

- ✓ Supports nitrogen efficiency
- ✓ Supports mineral replacement
- ✓ Designed for real-world fertility programs
- ✓ Supports practical program flexibility
